PUT MUSIC IN IT

ANY MUSIC YOU LOVE

With the **apio** app you can collect your favorite music from any source and compile your very own playlist.

LINKED AND CONNECTED WITH

With the help of object scanning (alternatively QR codes or RFID chips) **apio** helps you to link your favorite playlist with an object of your choice. The same technology helps to scan and retrieve the playlist link from the object that you received.

ANY ITEM YOU CARE ABOUT

You are free to pick any object, may it be a land mark, a picture of your best moments, your most precious thing or something that you created by yourself. Link the music with it and share it like a mixtape.
